

Shi Yuan Fang (石源坊)

Come here for a variety of jadeite and jade items. Both are natural stones, and they remind me of an old poem that describes the absolute beauty of the nature.

Description of the photo:	Photo:
<p>Do you want to buy authentic jadeite? It's important to go to a time-honored shop like this that gives you a certificate of authenticity.</p>	
<p>Jadeite is a type of mineral that takes several million years to form. It is famous for its glossy surface.</p>	
<p>Jadeite is divided into several groups by their transparency. Semi-transparent jadeite is called 'ice' type.</p>	

This carving shows longevity, happiness, and wealth.

Their items are very rare and high quality.

The Bodhisattva is one of the most popular carvings in all of China.

This is a “Tree Jade.” It's a type of petrified wood that comes from China's southern tip.
